

## International Roaming Country List

**IMPORTANT:** Based on country location and coverage, certain services and features may not be available. This is due to different contracts with various cellular providers within individual countries. Similar to Canada, most countries have several cellular companies, which have varying coverage areas & networks. Coverage is subject to change without notice.

Please follow the steps in the International Roaming User Guide to ensure that your Settings and Roaming Service Mode are programmed correctly for service while roaming. Please be aware that roaming charges for CDMA and GSM roaming may be different.

### **Placing Calls:**

**When placing a call from an international country back to Canada.**

**Dial:**

- '+' (if this does not work dial the International Access Code)
- 1
- Area code
- Local phone number
- Example: + 1-306-555-5555

**When placing a call from an international country to another country (ex: France to South Africa).**

**Dial:**

- '+' (if this does not work dial the International Access Code)
- International Country Code
- Area code
- Local phone number
- Example: + 27-area code-local phone number

### **Notes:**

On GSM networks press and hold the zero (0) key until the '+' sign appears on the screen. The '+' key automatically dials the International Access Code for the country from which you are calling.

On CDMA networks, the International Access Code must be dialled manually.

\* Used to place international calls from the country listed.

\*\* Used to call to the country listed.

~ Await a second tone at this stage
