
ITEM 160.35 Directory Assistance Call Completion Blocking**1. Service Description**

Directory Assistance Call Completion Blocking (DACC Blocking) is a service for people who do not want DACC calls to be made from their phone. DACC Blocking enables the DACC prompt to be blocked on a customer's telephone line. Blocking is accomplished when SaskTel, upon the request of the customer, places and maintains the customer's telephone number in SaskTel's Directory Assistance Call Completion Blocking table.

2. Conditions of Service

1. DACC Blocking is available on a per number basis.

Exception: DACC Blocking on a per trunk or channel basis is available only to alternate carriers or cellular providers.

2. With DACC Blocking, the customer still has the ability to contact SaskTel Directory Assistance.
3. DACC Blocking is not required for access lines from which Directory Assistance cannot be reached, e.g. access lines equipped with certain types of toll restriction.
