1000.13**Sale of Copper and Optical Facilities**

N

1. Service Description

This arrangement provides for the sale of in house copper and fibre facilities to a Saskatchewan Telecommunications (SaskTel) customer. These facilities are used to deliver service to the customer's multi-building operation on the customer's legally registered property. All of these facilities are on the customer's side of the demarcation point. This sale would include SaskTel's copper and optical facilities between the various buildings on the registered property, and the inside wire within each building.

The following is included in the sale:

- all designated copper and optical distribution facilities that is connected to SaskTel's demarcation point to outlying buildings located within their legally registered land including the buildings inside wire.

2. Conditions of Service

1. The Customer will own and maintain all designated in house copper and optical facilities purchased through this tariff located on the customer legally registered land location
2. The Customer accepts the cable and fibre facilities in "as is" condition.
3. There will be no warranty period associated with this sale.
