

SaskTel Conferencing Solutions

In today's world of tight deadlines and unpredictable finances, getting together can be a challenge. Teleconferencing and Web Conferencing solutions from SaskTel allow you to communicate effectively and efficiently, no matter where you are.

SaskTel Teleconferencing

SaskTel Teleconferencing helps you make decisions faster, stay ahead of the competition, and resolve issues quickly. It can reduce travel costs and improve efficiency by allowing you to communicate with other people in real time, from anywhere, 24/7.

SaskTel offers a variety of Teleconferencing options, including operator assisted conferencing for secure, professional, and high-profile events. Plus, conferencing solutions are available with no long-term commitment.

On Demand Conferencing Service

Achieve ultimate conferencing freedom with On Demand Teleconferencing. Once you've established a personal profile, you can access teleconferencing at any time without the need to book a call in advance. All that's needed is supplying your participants with the unique participant code and they'll be able to connect immediately.

Unattended Conferencing Service

Perfect for private and secure calls, Unattended Conferencing allows you to reserve a code for a specific conference call. You receive a unique code for the individual call to distribute to only those you would like to participate.

Attended Conferencing Service

Perfect for a private session with a professional touch, Attended Conferencing provides you with an operator who will start the conference, coordinate participants, and provide assistance as needed, ensuring your call is easy and trouble-free.

Event Call Conferencing Service

Event Call Conferencing service is ideal for high profile conferencing events. An event manager is available for the reservations and the planning of the call, and a dedicated operator provides assistance during your call for professional introductions, Q&A's, and ensuring a worry-free call for you and up to 3000 participants.

SaskTel Web Conferencing

SaskTel Web Conferencing is a pay-per-use service that allows you to hold unscheduled and interactive meetings online. Charges are calculated on a per-minute, per-participant basis, so you're only charged for the minutes you use and the actual number of people that login to the call. There are no setup fees and no contracts to sign. SaskTel Web Conferencing lets you easily connect for interactive customer presentations, product demos, team meetings, document reviews, and much more!

At SaskTel, we're the Experts in our business so that you can be the Expert in yours.
