
ITEM 110.50 Local Loop – Conditioning**1. Service Description**

Local Loop – Conditioning may be required in order to obtain the desired facility (line) characteristics for voice or analogue data transmissions.

The following types of conditioning are available:

Type	Required for...
Analogue Data – Schedule 4, Type 4/4A/4B/4C	4 wire facilities, such as: <ul style="list-style-type: none">• analogue data transmissions on a dedicated voice grade facility.
Analogue Data – Type 2	2 wire facilities, such as: <ul style="list-style-type: none">• analogue data transmissions on a switched voice grade facility.
Voice	2 wire facilities, such as: <ul style="list-style-type: none">• off-premise locals associated with PBX,• off-premise network access associated with key systems,• tie trunks,• off-premise extensions with the SmartTouch features: Ident-A-Call or Intercom.

2. Conditions of Service

1. For 4 wire facilities, customers must identify the type of conditioning required based on their type of equipment.
2. For 2 wire voice facilities, conditioning is required on the types of applications listed in the ‘Types of Conditioning’ table above and is applied once per channel.

2. Conditions of Service – Continued

3. Bridging equipment is required when 2 or more legs (ie multi-drop) are connected (or bridged) to a main facility or leg.
4. The charge for bridging equipment applies for each leg (ie multi-drop) on a multi-point arrangement beyond the main facility or leg.
5. The charge for IX channel X-Connect applies once, in the rate center, for each connection of an analogue private line to another data service. These other data services may include a port on a shared Managed Digital Private Line Terminating Equipment (MDPLTE), a Packet Service access, etc.
6. All Local Loop - Conditioning Services are provided subject to the availability of suitable facilities and equipment.

3. Rates

The Customer shall pay to SaskTel the following rates and charges for Local Loop – Conditioning. Such rates and charges are in addition to any other rates and charges that may be applicable.

The following table identifies how rates are applied for conditioning and bridging equipment:

If equipment is for ...	Then the rate is ...
Voice conditioning	applied once per circuit.
Type 2	applied per leg.
Schedule 4, Type 4/4A/4B/4C	applied per leg.
bridging equipment	applied once per 2-wire <i>or</i> 4-wire facility.
