
Extended Network Access Service

F

Description

Extended Network Access Service extends a Customer's touch-tone network access to another location on the same or different premises, within the same exchange.

F

Terms and Conditions

These terms, conditions and rates apply only to exchanges that are forborne from regulation, as identified on page 360, *Forborne Local Exchanges*. For all other locations, refer to the regulated General Tariff.

C
F

1. The maximum number of alerting devices per line (either part of the telephone or external to it) is usually five. This depends on the transmission characteristics of the circuit and the type of terminal equipment.
2. Network access can be extended to a different Customer's premise only if primary network access already exists at that location. F
3. Residential service cannot be extended to a business premises, unless the classification of service changes to business.
4. Separate telephone numbers are not supplied with Extended Network Access Service. F
5. Extended Network Access Service is not available for switched data access arrangements.
