

SaskTel Business Connect and Hosted Email & Collaboration

Get the Internet service your business deserves with SaskTel Business Connect. Enjoy the same great high speeds and reliability as SaskTel High Speed Internet with the benefit of additional support and add-ons to ensure your business is up and running when it needs to be.

To keep you connected, the next step is SaskTel Hosted Email & Collaboration email service. SaskTel Hosted Email & Collaboration is more than just email, it's an industry-leading suite of collaborative tools that help you stay connected and manage your business, with advanced calendaring, messaging, and database functionality.

SaskTel Business Connect

Your business is our priority and with SaskTel Business Connect you have access to a 24/7 priority support line, 2 included Static IP addresses, and a VIP package that includes a managed firewall and a Virtual Private Network (VPN). Also take advantage of our new Business First Support Team who will be your direct contact for technical support.

SaskTel Business Connect is an efficient and powerful way to manage your business Internet services and will enhance the great SaskTel Internet services you're used to. Because every business is different, SaskTel Business Connect offers several options to meet the specific needs of your organization.

SaskTel Business Connect Packages*:

- **Prime** – Provides your business with a High Speed Internet connection and the increased support your business deserves.
- **VIP** – Offers your business a High Speed Internet connection and the ability to share corporate information and files with branch and remote locations in a secure environment with a managed firewall and a VPN.
- **National** (requires VIP) – If your business locations extend beyond Saskatchewan borders, this option allows for secure file sharing and communications outside of the province.

SaskTel Hosted Email & Collaboration

Enhance your SaskTel Business Connect service with SaskTel Hosted Email & Collaboration.

SaskTel Hosted Email & Collaboration is a fully managed, highly scalable, business email and collaboration service that includes email, calendaring, presence, instant messaging, database functionality, real time mobile device synchronization, and much more.

Benefits

With SaskTel Hosted Email & Collaboration, your business will benefit from:

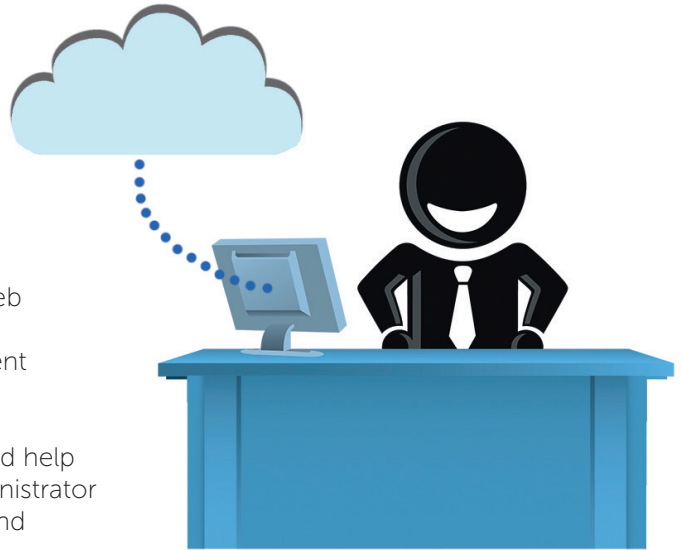

- **Self management tools** - Take control of email & collaboration with a single point of administration for the entire solution across locations.
- **Maintenance and patch updates provided daily** - Never worry about maintenance, patches, or software upgrades again. Updates are performed daily to ensure your email- environment is secure and running at peak performance.
- **A centralized solution** - Reduce complexity of having multiple platforms to manage. Support one environment for multiple locations.
- **Advanced data security and site management** - Protect you business with seven layers of anti-virus protection, plus advanced administrative controls for site management and permissions.
- **Worldwide access** - Achieve quick and easy access to your email from anywhere in the world where Internet access is available.
- **Increase productivity** - Take full advantage of collaboration benefits of Exchange, SharePoint, and Lync.
- **Reduced operating costs** - Save money with converged communications and choose from multiple price plans that allow you to select the right combination of features for your business.
- **24/7 Support** - SaskTel is putting your business first - get peace of mind from 24/7 support with our new Business First Support Team that is dedicated to your business.

Components

SaskTel Hosted Email & Collaboration is made up of 3 components:

- **Hosted Exchange** - Provides a business email service that can be accessed over the web or with an Outlook desktop client. Features include calendar, address book, and mobile device synchronization.
- **Hosted Lync** - Enables users to communicate effectively with one another through instant messaging (IM), presence, and web conferencing.
- **Hosted SharePoint** - Facilitates collaboration through document sharing and provides full content management features.

These components can be used together to improve productivity and help employees and customers stay connected. The Cloud Control Administrator portal also allows your Administrator to use a single administration and management portal for all services to manage and maintain users.

SaskTel, your trusted Information and Communications Technology company. We're the Experts in our business so that you can be the Expert in yours.
